

## Automation Collaboration.

**Audi, BMW, DaimlerChrysler and Volkswagen** chose PROFINET as their common Industrial Ethernet platform to achieve maximum productivity goals and cost savings, while overcoming incompatible systems. PROFINET is the common, uniform Ethernet standard that allows you and your suppliers to protect your existing investments and quickly implement PROFINET-based systems that meet the requirements of next generation automation systems. Integrate IT, real time automation and safety applications, all fully compatible with IEEE802.3 standards. The wait is over. Subscribe to the PROFINET Electronic Update and download our Technology & Application Guide today at [us.profibus.com/profinet](http://us.profibus.com/profinet)
